

## **COVID-19 Behind the Walls**

Prisoner Report Dated May 1, 2020

**5/1/20 SECC SM (wife of prisoner):**

Wanted to forward you updated information on Southeast Correctional Center [SECC]: I hadn't heard from my husband since they allowed him the 5 minute call on Tuesday, so yesterday I contacted Constituent Services in Jefferson City and left a message. They called me this morning and I informed them of not hearing from AM on a regular basis since this virus. He told me that he'd contact SECC to get additional information and get back to me. Within the hour my husband called. He didn't sound like himself, so asked him what was going on. He said he had been awakened by the guard and asked if he wanted to use the phone (Really?? This doesn't happen). Per AM he's only getting showers every other day; no other activities. Tablet still not working. The call ended after 10 minutes.

He has pain in his right leg and it's been swollen for couple of weeks. He put in an MSR (Medical Service Request form for seeing doctor or someone in medical) over a week ago and hasn't seen anyone, was told to put in another one, which he did a couple of days ago, directed to Ms. Mollie (medical). Another inmate in general population contacted me this afternoon (to check if I'd heard from AM) and he gave me the following updates:

1. They are no longer receiving daily updates from Warden
2. Guards working where positive cases are also working in other housing units
